

### KEY FEATURES

(480) 1.5W RGB LED's in 20 Zones

(200) 5W CW Strobe LED's in 10 Zones

(80) 1.5W RGB StrobeLine LED's in 10 Zones

Completely Fanless Cooling

Integrated L Track for Flexible Mounting

Unique End-to-End Interconnection System

Art-Net, sACN and KlingNet Support

IP65 Rated

Ignite excitement and get the crowd pumping with the new **PULSE BAR S!** The first in an innovative Pulse line of strobe lights, the Pulse Bar is a highly impactful strobe and visual effect bar that injects dynamism and spark into any performance!

Measuring half a meter in length, the **PULSE BAR S** incorporates 480 1.5W RGB LEDs distributed across 20 zones along its perimeter. Additionally, it features a central strobe line equipped with 200 5W cool-white LEDs across 20 zones, complemented by 80 1.5W RGB LEDs arranged in 10 zones at its core. When combined, these components deliver an output exceeding 13,327 total lumens.

Infuse your performance with intense, attention-grabbing moments of white or colored light that enhance the energy of the moment. Add impact with rhythmic flashes that synchronize with the music or craft special effects that make for a more visually stimulating experience. Ideal for direct view applications, zone control opens up for a myriad of design possibilities.

The **PULSE BAR S** includes a library of customizable RGB and CW strobe effects along with variable dimming modes and curves for quick programming. Wrapped in a durable, fully IP65-rated housing, the **PULSE BAR S** is suitable for any environment, indoors or outdoors, and its marine grade coating adds additional protection for harsher environments- even coastal locations.

The fanless convection cooling of the **PULSE BAR S** guarantees silent operation, making it ideal for noise-sensitive environments. Designed for ultimate flexibility, an integrated accessory slot accommodates optional diffusion filters, ND filters and other optics.

The **PULSE BAR S's** innovative housing allows for end-to-end interconnection and includes integrated L track for flexible mounting and positioning. Trunnions designed for attachment to the L track can be fixed at multiple points to optimize positioning around objects or obstacles.

Controlled via DMX/RDM, Art-Net, sACN, and KlingNet protocols, the **PULSE BAR S** also features proprietary Aria x2 wireless device management for simplified system setup and maintenance.

When the moment calls for high-impact bursts of light and visually striking effects, look no further. The **PULSE BAR S** delivers!
